SLIDE STAINING MACHINE

S-STAINING-24

A fully automated, microprocessor-controlled slide staining (**S-STAINING-24**) system designed for consistent, high-quality staining of haematology slides. It ensures uniform staining results, reduces manual handling, improves laboratory efficiency, and supports high-throughput diagnostic workflows with reliable and reproducible performance.

KEY FEATURES

Control & Display System

- Large 20×4 Line Display.
- LCD soft touch keypad.
- Microprocessor Controlled System.
- Improved Pin-Up Time Control.
- Wide Time Control Range.

Construction & Build Quality

- Premium Stainless Steel Construction.
- Heavy-Duty Glass jar
- Durable & Stable Structure.

Processing Performance

- Continuous Rotation.
- Uniform Reagent Penetration.
- High specimen throughput for increased laboratory productivity.
- Smooth & Silent Operation.

Operational Reliability

- Stable Basket Movement.
- Long Service Life.
- Reliable Performance During Continuous Operation.

Staining Performance

- Provides consistent and reproducible staining results.
- Ensures uniform and reproducible staining quality.
- Automatic slide transfer between reagent stations.
- Adjustable immersion and agitation timings.

Safety & Protection System

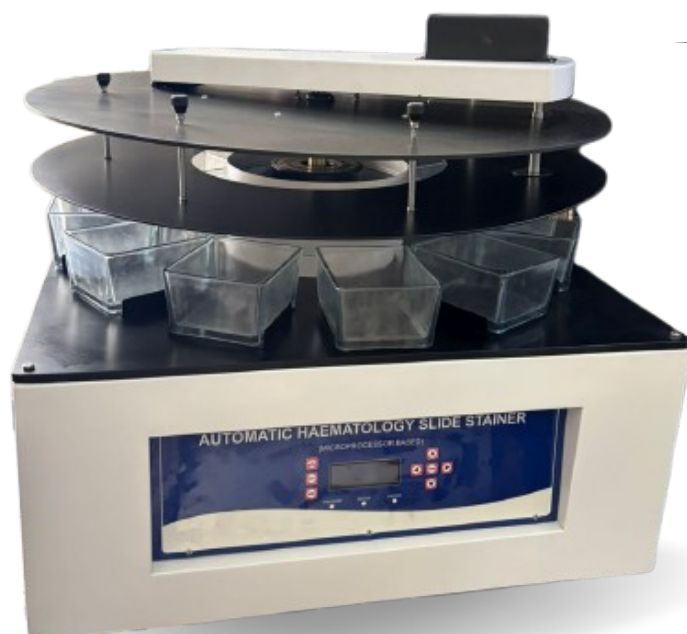

- Minimizes reagent exposure and contamination risks.
- Durable construction with smooth and reliable operation.
- Durable and robust construction for long service life.
- Easy operation and low-maintenance design.

TECHNICAL SPECIFICATION	
Controller	Feather touch key pad..
Display	Large 20×4 Line Display.
Number of Staining Troughs	12
Trough Material	Glass
Trough Volume	450 ml (Each)
Trough Capacity	20 Slides
Slide Carrier	1 No.
Programming	<i>Adjustable Timing Sequence</i>
Power Supply	220V AC, Single Phase, 50 Hz

ACCESSORIES

- 1.RACK- 1NO
- 2.LEAD-1 NO
- 3.FUSE-2 NOS
- 4.DUST COVER-1 NO
- 5.GLASS JARS- 12 NOS
- 6.OIL CAN - 1 NO
- 7.OPERATING MANUAL-1 NO
