LINEAR AUTOMATIC SLIDE STAINER

S-STAINER-24

Linear Automatic Slide Stainer (S-STAINER-24) is a fully automated staining system designed for efficient, uniform, and high-throughput staining of histology and cytology slides. It ensures consistent staining quality, minimizes manual handling, and enhances laboratory productivity through precise reagent control and programmable staining cycles. Ideal for pathology, research, and diagnostic laboratories.

KEY FEATURES

- Imported high-quality components for smooth, reliable, and low-noise operation.
- Intelligent control system with automatic fault detection and recovery.
- Large LCD touchscreen with user-friendly interface and online help support.
- Built-in air purification system for effective removal of harmful fumes and gases.
- Automatic calculation and display of processing time for better workflow planning.
- Stores multiple editable staining programs in English and Chinese for easy retrieval.
- Intelligent automatic water filling, draining, and pressure control system for efficient washing.
- Up to 36 programmable staining protocols with operation error alert function.
- Real-time graphical display of staining progress and system status.
- Ergonomic design for convenient and comfortable operation.

TECHNICAL SPECIFICATION	
Number of Cups	18 (Station 10 is for washing and Station 1 is for drying)
Number of slides processed at the same time	52 slides
Length of Processing Time in the Cup	Adjustable within 0 - 59 minutes and within 0 -59 seconds
Dripping Time	Adjustable within 0-30 s (shakes above cup)
Working Voltage	AC 220V±10% 50Hz (standard model); AC110V±10% 60Hz
Power	500 W
Dimensions	1175×460×470 mm (W×D×H)
Weight	<i>Adjustable Timing Sequence</i>
Power Supply	70kg
