SPENSER ROTARY MICROTOME

S-CUT-24

Spenser Rotary Microtome (**S-CUT-24**) is high-precision laboratory instrument designed for cutting thin and uniform tissue sections for histopathology and research applications. Ensures smooth operation, accurate sectioning, and reliable performance for routine laboratory use.

KEY FEATURES

Construction & Durability

- Rust Proof Construction
- Corrosion Resistant Finish - Suitable for long-term laboratory use
- Robust and Stable Base Plate
- Durable Components for Extended Service Life
- Long Service Life - Engineered for reliable operation

Precision & Performance

- High-Precision Specimen Feed
- Uniform Section Thickness - Ensures consistent cutting results
- Low Vibration for accurate sectioning
- Reliable Performance - Consistent results over long periods
- Suitable for Paraffin Sections - Ideal for routine histology applications

Operation & Control

- Smooth-Running Handwheel
- Manual Feed Control - Better control over sectioning process
- Adjustable Knife Angle for precise cutting adjustments
- Standard Specimen Clamp for secure specimen holding

User Convenience

- Easy Specimen Mounting - Quick and convenient sample fixing
- Ergonomic Design - Comfortable handling during operation
- Compatible with Standard Blades - Easy blade availability and replacement

**PRECISION IN EVERY
SECTION IN EVERY RESULT**
Engineered for Accuracy. Built for Reliability.

TECHNICAL SPECIFICATION

- Section Mode - manual.
- Section thickness setting - 1-50 micron (in step of 1 micron).
- Standard knife length - 120mm.
- Knife angle- 0 to 10 deg.
- Block Holder set of 3pc-1 set.
- Specimen orientation - 360 deg C.
- Maximum specimen size - 32mm.
- Vertical specimen stroke - 60mm.

ACCESSORIES

1. Embedding Rings- 12 Nos
2. Embedding Cups - 3 Nos (small, Medium, Large)
3. Dust Cover - 1 No
4. Waste Tray - 1 No
5. Brush - 1 No (Small & Big)
6. Operating Manual - 1 No
7. Disposable blade attachment high or low (either one) - Optional
